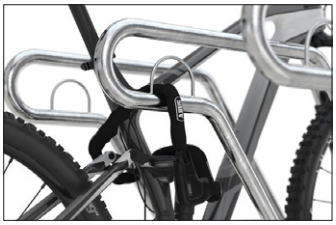
Weight	50,40 kg
Construction type	Screwed / assembly kit
Base material	Steel
Mounting type	On the floor
Bike spacing	350 mm
Tyre width	55 mm
Configuration	One-sided



This free-standing bicycle parking system welcomes its users with generous waist-high horizontal frame rests; an arrangement that makes the safe parking of even highest-quality bicycles such as pedelecs and e-bikes even more comfortable. One can also reach the round steel eyelets integrated into the frame rests to which bicycle locks can be securely attached without bending over. The Parker with Frame Rest 2600 offers the highest level of parking comfort for employees, customers and guests or for their owner. The alternating low/high hoop settings save valuable space. The system is prefabricated for ground mounting and series connection. Meets the requirements for theft protection according to DIN 79008:2016-05 point 7.2.

- **+ Free-standing, bolted tubular steel construction**
- **+ Protection through comfortable frame rests**
- **+ Integrated eyelets to prevent theft**
- **+ Prefabricated for row/series connection**
