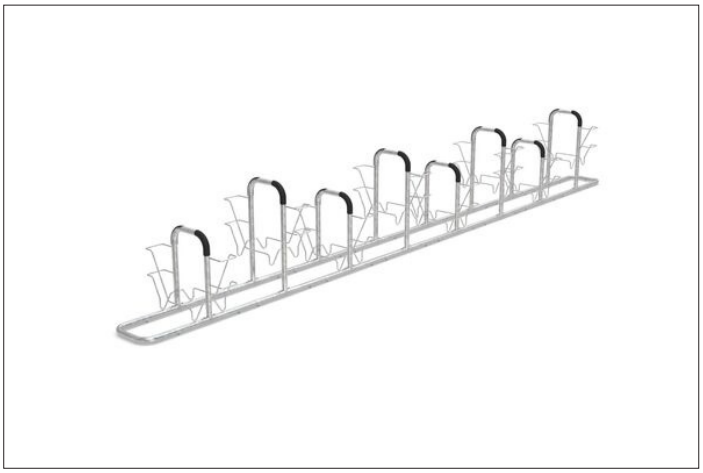
Bicycle stands

6116

Sophisticated, flexible and quickly ready for use
Thought-out bicycle parking system with front wheel holder and cleverly placed plastic elements to protect the bikes.

Article number	EAN	Width	Height	Depth
105800170	4250366537030	7268 mm	1060 mm	760 mm



Parking spaces	16
Colour	Silver
Knee-high crossbar	No
Construction type	Screwed / assembly kit
Base material	Steel
Mounting type	On the floor
Bike spacing	850 mm
Configuration	Two-sided
Positioning space depth	3200 mm

The Safety bicycle rest 6000 features a two-part front wheel holder for parking bicycles, offering four points of contact with the wheel for a particularly secure hold. Plastic elements on the frame protect the bicycle from damage while parking. Its tubular steel substructure enables the system to stand by itself and does not require being fixed to the ground. This saves you time and money by eliminating the need for ground work. Optional concrete weights which fit exactly on the tubing can be used to weigh down the system and thus fix it in place. Your advantage: vandalism is made impossible, while you simultaneously have the option to move the system as your needs change.

- **Stand-alone tubular steel construction**
- **Optional concrete weights**
- **Plastic elements on the frame protect the bike**
- **Four contact points for secure hold**
- **Protected by European design**
