This bicycle rest sets a special accent: instead of round tubing, here 60 mm wide and 10 mm thick bent flat steel is on the job. Whether urban design or a single architectural concept; the Safety Bicycle Rest 9600 is a pleasing eye-catcher. Like all our stanchion systems, this is also suitable for every type and size of bike. All design enthusiasts simply opt for this design variant. It is also available with an additional knee-high crossbar on request. All models have a post extension of approx. 200 mm for optimal embedding or over-paving.

- **+ Stable steel construction of flat steel, 60 x 10 mm**
- **+ Corrosion protected through hot-dip galvanising**
- **+ Version with knee-high crossbar available**
- **+ For setting in concrete, under paving or bolting down**
- **+ Flat design for modern look**
