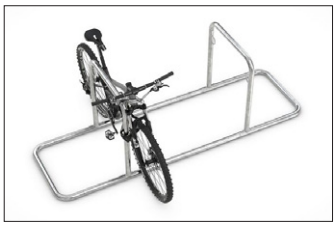
Parking spaces	6
Colour	Silver
Knee-high crossbar	No
Construction type	Screwed / assembly kit
Base material	Steel
Mounting type	On the floor
Bike spacing	1200 mm
Configuration	Two-sided



The GALAXY XL lean & rest system stands alone and needs no concrete or foundation work. Bolt together, place upright – done! If you want to create many parking spaces, you can make fast progress. The 32-36 XL models offer between four and twelve parking spaces, which are designed to save space through double-sided access. The injury-resistant tubular construction without corners and edges provides safety for the rider; integrated steel eyelets for bicycle locks do the same for the bicycle. GALAXY can be easily attached to the ground and be extended to almost endless row systems. If required, an optional advertising sign can be integrated. Available in many RAL colours. XL version with larger bike spacing.

- **+ Free-standing, bolted tubular steel construction**
- **+ Corrosion-protected through galvanising**
- **+ Integrated eyelets to prevent theft**
- **+ Prefabricated for row/serial connection**
- **+ Optional advertising signs can be added**
