Electronics

InHeat 2500 mm depth

Comfortable warmth while waiting
Infrared heating system featuring easy, tool-free installation for new bus stops and shelters or for retrofitting. Radio request button with 10-minute timer.

Article number	EAN	Width	Height	Depth
102001975		92 mm	40 mm	2500 mm

Base material	Aluminium
Operating voltage	230 V
Total output	1500 W
Illuminant	Infrared Element
Protection class IP	IP20
Protection class	Class I
External power supply unit	No
Radiation	Direct
Radiation angle	60°

Energy efficient heating system, specially designed and developed for bus stops and shelters. A 1500 watt infrared heating element provides for a warm ambiance while waiting and reduces energy requirements. The heating system is equipped with a timer fixed at 10 minutes. The supplied water-protected pushbutton is based on battery-free radio technology, is maintenance-free, and can be mounted on all smooth surfaces within the range of the transmitting distance, independent of cables. The InHeat heating system is installed without tools and suitable for both new shelters and retrofits.

- **1500 W infrared heating element**
- **Energy-efficient operation without preheating**
- **Battery operated radio push button with timer**
- **Tool-free, simple assembly**
- **For original equipment or retrofitting**
