InLight 43 W

Elegant and very exclusive: The InLight Lamp
The clever Lighting system that defies wind, weather and vandalism. Illuminates everything under your shelter with only one lamp.

Article number	EAN	Width	Height	Depth
102001841	4250366533629	92 mm	40 mm	2011 mm

Base material	Aluminium / Polycarbonate
Operating voltage	230 V
Total output	43 W
Illuminant	LED
Presence detector	No
Protection class IP	IP44
Protection class	Class I
External power supply unit	Yes
Radiation	Direct
Radiation angle	120°

To make our shelter systems feel more secure at night, we offer suitable lighting systems. The InLight lighting-system can be embedded into the trapezoid roof constructions of our shelter systems. That way, it blends into the overall design seamlessly and is safe from vandalism as an added bonus. Furthermore, the whole area under our shelter is illuminated brightly and evenly with only one lamp. The low energy consumption and the long lifespan of the LEDs we use both save you money.

- **Embedded into the roof construction**
- **Vandalism-proof**
- **Illuminates the whole area evenly and brightly with only one lamp**
- **Low energy consumption**
- **Long lifespan**
