

## Bicycle racks

# Lean-to parker 2502 Black Edition

### Top recommendation for bicycle parking

This self-standing lean-to parker protects even high-end bikes from damage and theft, thanks to functional leaning brackets and integrated steel eyelets.

Construction type	Screwed / assembly kit
Base material	Steel
Mounting type	On the floor
Bike spacing	350 mm
Tyre width	55 mm
Configuration	One-sided
Positioning space depth	1850 mm

Our brand new Black Edition adds a special touch: a striking detail of this bicycle parking system are the slanted parking bars, which are completely black and covered with black rubber. They reliably protect every bicycle or e-bike from deliberate or accidental tipping over and prevent consequential damage to the rims. Integrated steel round eyelets provide optimized theft protection. The distance between the bars is generously

dimensioned and suitable for bikes with tire widths up to 55 mm. As an installer, you can offer yourself, your employees, customers, and guests the highest level of parking convenience. Of course, the system is prepared for floor mounting and row connection. Complies with the requirements for theft protection according to DIN 79008:2016-05 point 7.2.

- + Freestanding bolted tubular steel construction
- + Large, plastic-coated leaning brackets
- + Integrated fastening eyelets for optimized attachment of anti-theft devices
- + Prepared for series connection
