The „Siegen“ shelter system is inexpensive, uncomplicated and quick and easy to set up. In no time you become the proud owner of a practical shelter especially designed for bicycles and stock goods. With this optional side wall you can increase the protection that the shelter offers. The side wall seals the shelter system at the side, making it wind- and rainproof and leaving the weather out in the rain. This accessory module is made of trapezoidal sheet metal coated in RAL 9002 grey-white and is opaque. The two-piece, galvanised supporting frame provides stability. This version is for left-side application. Suitable for models S14, S16, S17, S18 and S19.
