Operating voltage	230 V
Dimensions of locker	
Locking mechanism	
Protection class	

The share of e-bikes in bicycle sales continues to rise. With the charging station for the 4500 XBF, 4700 XBF and 2500 XBF lean-to bike racks, you not only ensure safe parking, but also make it possible to charge the e-bike directly. Whether in public spaces, on company car parks or in residential complexes. The charging station can also be easily retrofitted to existing parking facilities.

This saves you the cost of purchasing new parking facilities. One standard socket per parking space ensures that every bicycle is supplied and maintenance costs are minimised. A forward-looking concept that fits effortlessly into existing infrastructures and offers real added value.

- + Easy to retrofit for existing bicycle racks
- + One standard socket per parking space
- + Future-proof and space-saving
- + Robust, weatherproof construction
- + Available with safety nuts to prevent vandalism
