Clear width	3227 mm
Clear height	2500 mm
Clear depth	2167 mm
Location	Indoors
Colour	RAL 9002 - Grey white
Number of wall elements	10
Base area	7,28 m ²
Crane hook	Yes

The R model series is the original and long-time favourite in a tough industrial environment. This highly robust protective system is perfectly optimised for its intended use; for example, as a soundproof cabin, foreman's office or multi-purpose room. The excellent sound insulation achieved through rubber-retained glazing is a particularly advantageous feature of this model series. Mobility is another strength of this system, as it can be

easily and quickly repositioned if your plans change. Moreover, it can be extended, even after decades. In addition, the R model series accessories offer you almost limitless design possibilities - whether electrical connections, communication connections, air conditioning or lighting. Furthermore, the room system can be limitlessly expanded in terms of surface area and is also available as a double or three-storey construction.

- + Fully assembled complete solutions immediately ready for use
- + Crane hooks for speedy repositioning
- + Excellent sound insulation
- + Available with or without floor
- + Large range of accessories
