Due to its special design and construction, the „R“ model series qualifies itself as a room system for any demanding working environment. Whether as office, gatehouse or warehouse, this model adapts to your needs. The glass and wall elements framed in rubber profile not only bestow the room its classic appearance, but also high values in sound insulation. By employing appropriate insulation and the use of double glazing, this model is designed

for outdoor use. What's more, the available accessories give you a wide range of design options – whether electrical connections, communication lines, air conditioning or lighting. With its standardised modular construction, the system can be extended over large areas up to three storeys high. Thus, this building doesn't limit you to container dimensions.

- + Excellent sound insulation
- + 24-mm insulating glazing in rubber retaining profile
- + Exchangeable wall and glass elements
- + Floor plan freely adaptable
- + Accessories for every application area
