

Gutters

Gutter for shelter Siegen

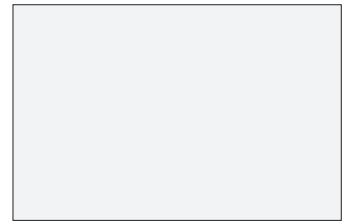

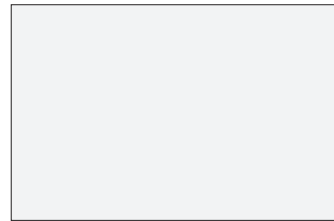

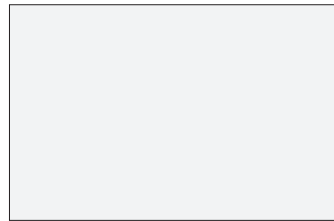

Square away the rain: protection and simple installation

Box roof gutter made of resistant, impact-resistant and durable plastic. Assembly is carried out without seals using a special adhesive.

Article number	EAN	Width	Height	Depth
102000017		4300 mm	51 mm	65 mm

Base material	Plastic
Colour	RAL 7016 - Anthracite grey
For model	Siegen

With the rain gutter for the Siegen shelter system, you can protect your roof from damage caused by rainwater. The box roof gutter is made of impact-resistant, temperature-, weather- and UV-resistant plastic, which guarantees an impressively long service life and is even recyclable. In the event of temperature fluctuations, it is

equipped with the cam-groove system, which easily compensates for possible linear expansions. Installation is child's play: no seals, just a special adhesive. This means that the gutter, fittings and downpipe are securely connected in no time at all.

- + Made of durable, impact-resistant and weatherproof plastic
- + Cam-groove system against uncontrolled linear expansion
- + Easy to install due to special adhesive instead of seals
- + Very long service life
- + Recyclable material, no water pollution
