The „Siegen“ shelter system is inexpensive, uncomplicated and quick to set up. So you will receive a practical shelter especially for bicycles and stock goods in no time. With this optional side wall you can increase the protection offered by the shelter. The side wall makes the shelter system wind- and rainproof to the

side and gives the weather no chance. The accessories consist of trapezoidal sheet metal coated in RAL 9002 grey-white and are opaque. The two-piece, galvanised supporting frame provides stability. This version is for right-side application. Suitable for models S14, S16, S17, S18 and S19.
