Octa

Always put in the right light

Energy-efficient, service-friendly and corrosion-protected LED lighting system with presence detector suitable for pavilions of the Paris model range.

Article number	EAN	Width	Height	Depth
102100346	4250366536286	380 mm	48 mm	380 mm

Base material	Aluminium
Operating voltage	230 V
Total output	12 W
Illuminant	LED
Presence detector	Yes
Protection class IP	IP44
Protection class	Class I
External power supply unit	No
Radiation	Direct
Radiation angle	120°

Energy-efficient, service-friendly and corrosion-protected Octa LED lighting system with 1,200 lumens suitable for square pavilions of the Paris model range. The built-in presence detector switches the lighting on when required. When not present, the system dims down for basic illumination and returns to the preset lighting level when present. The 8-cornered lighting with

integrated power supply unit is made of galvanised material to protect against corrosion. The cover plate is additionally colour-coated in RAL 7016 anthracite grey. The Octa lighting system is easy to service, but concealed and thus optimally protected against moisture and vandalism. IP 44, protection class I.

- + Energy-efficient LED lighting system
- + 1,200 lumen light output, neutral white
- + Dimmable, control via built-in presence detector
- + Integrated power supply unit, IP 44, protection class I
- + Service-friendly and corrosion-protected
