Base material	Steel
Mounting type	Telescopic column
Configuration	One-sided

This comfortable, free-standing suspension park system can accommodate up to two bicycles. The system consists of a load-bearing, silver colour anodised aluminium telescopic rail, a large adjusting screw on the floor and two infinitely height-adjustable holders with plastic-coated hooks in RAL 3000 flame red signal

colour. The holders each carry bicycles weighing up to 25 kg and have an adjustable angle of inclination that makes it easy to safely secure women's bicycles. The plastic coating reliably protects against scratches and dents. SPACER is variably suitable for room heights from 2050 to 2600 mm.

- + Aluminium telescopic rail, anodised
- + Plastic-coated holders with 25 kg load capacity each
- + Holder with adjustable tilt angle
- + Installation with floor-side locking screw
- + Variable for room heights from 2050 to 2600 mm
