The double-deck parker in a class of its own, setting standards in quality and safety. The robust, corrosion-protected steel construction with aluminium support rails is suitable both for parking facilities at your company or residential complex and for permanent use in public spaces. It complies with DIN standard 79008-1 and has been tested by TÜV, which means that it is demonstrably barrier-free and childproof. Anti-theft devices according to standard specifications offer easily accessible locking

options and ensure that even high-quality bicycles can be parked safely. The ergonomic lifting aid with gas pressure damper and the smooth-running carrier rail - extended at a distance of only 320 mm from the ground - ensure that even heavy bicycles can be parked without any problems. Suitable for tyre widths up to 55 mm. Lateral wheel distance according to DIN 79008-1 at least 500 mm.

- + Space-saving parking due to double-decker use
- + Low effort due to lifting aid with lift function
- + Optimised for theft protection and barrier-free
- + Optionally for one or two-sided wheel adjustment
- + Modularly expandable for row systems without any problems
