The Safety Bicycle Rest 9200 enables the quick realisation of particularly robust and stable comfortable bicycle parking systems with optimal theft protection. Ideal for parking spaces heavily used by employees, guests, customers or students. The freely mountable stanchions and a practical knee crossbar of corrosion-resistant 48

mm tubular galvanised steel or V2A stainless steel make it easy to park all bike types and sizes. Good to know: the versions for bolting down have a a post extension (+200 mm) available on request for over-paving, and for row/serial installation there are also practical mounting rails on request.

- + Sturdy tubular steel construction, galvanised
- + Practical, visually appealing knee crossbar
- + For setting in concrete or bolting down
- + Post extension for over-paving possible
- + Mounting rails for row/series installation on request
