Side walls	One-sided

With its elegant design, the BinStore 1 ensures that your rubbish bins are simultaneously out of sight and protected from wind and rain. A waste bin with a capacity of up to 240 litres can be placed inside through the hinged door. The hinged roof of the enclosure can be connected to the waste bin lid by a chain, allowing both to be opened at the same time. Optional gas springs ensure that

opening is even easier while ensuring that the hinged roof remains open. The modular sheet steel construction is robust, durable and allows for extension into rows of any length. BinStore 1 is ideal for schools, sports facilities, authorities, companies, campsites, residential complexes or private households. Delivered as a kit, assembly material and assembly instructions are included.

- + Robust sheet steel construction, corrosion-protected and value-retaining through galvanisation
- + Elegant design available with finish in RAL colour of your choice
- + Space for waste containers up to 240 litres capacity
- + Optional gas springs ensure easy opening of the hinged roof
- + Waste bin lid opens with the hinged roof
