The BikeBox 3 offers even more protection, not only against wind and weather but, above all, against theft and vandalism. This is ensured by its stable construction of particularly robust, corrosion-protected sheet steel and a special security lock. If you want to park high-quality bicycles, pedelecs and e-bikes outside of

buildings for an extended period here is the right solution – ideal for companies, hotels and B&Bs, campsites, residential complexes, private households or bike & ride stations. The modular design allows the replacement of individual parts and enables extension to series systems of any size.

- + Particularly robust sheet steel construction
- + Corrosion-resistant value-retention through galvanising
- + Standard with high-quality cylinder lock
- + Modular design for replacement and extension
- + Optional accessories for charging batteries
