The BikeBox 2 offers even more protection, not only against wind and weather but, above all, against theft and vandalism. This is ensured by its stable construction of particularly robust, corrosion-protected sheet steel and a special security lock. If you want to park high-quality bicycles, pedelecs and e-bikes outside of buildings for an extended period here is the right solution – ideal

for companies, hotels and B&Bs, campsites, residential complexes, private households or bike & ride stations. The modular design allows the replacement of individual parts and enables the extension to a series of systems of any size. Parking rail. Optional with foldable shelf for chargers and power distribution box made of impact-resistant plastic with 250 V/16 A IP 44 socket.

- + Particularly robust sheet steel construction
- + Corrosion-resistant value-retention through galvanising
- + Standard with high-quality cylinder lock
- + Modular design for replacement and extension
- + Optional accessories for charging batteries
