Colour	RAL 7016 - Anthracite grey
Material	Steel
Weight	34,00 kg
Surface finish	Galvanised and color coated
Assembly	On the floor
Locking mechanism	Push-in cylinder
Side walls	One-sided

Wherever people are dependent on walkers, this box made of robust, corrosion-protected sheet steel performs well. It offers space for a walking aid, which can be parked directly in front of the front door, at senior citizens' homes or at the entrance of surgeries, clinics and rehabilitation facilities. A standard single-lever

handle cylinder lock protects against unauthorised access and can be operated without bending down. The modular design allows individual parts to be exchanged and allows for expansion to row systems.

- + Robust sheet steel construction with gable roof
- + Corrosion-protected, stable value through galvanization
- + Single lever handle cylinder lock
- + Modular design for replacement and expansion
