Seats	2

This compact, classic bench with two or three seats is suitable for many bus shelters, providing a comfortable place to sit. The bench is made of solid metal wire mesh. It has a separate metal wire mesh backrest for each seat which is the same height as the depth of the seat. The substructure can be free-standing, either

with base plates for anchoring or setting in concrete. The steel construction, which can bear a load of up to 100 kg per seating place, is hot-dip galvanised and powder-coated. It is available in numerous RAL colours and can thus be colour-matched to the bus/train/tram shelter.

- + Compact bench with backrests
- + Made of solid metal mesh
- + All steel parts hot-dip galvanised
- + Powder-coated and painted to RAL
- + Load capacity per seat 100 kg
