

Suspension parking system for space-optimised wall mounting

Wall-hanging system for the space-optimised storage of bicycles of all kinds and all tyre widths. Rim-friendly sheathing. Simple bolt-on dowel mounting.

Article number	EAN	Width	Height	Depth
105700097	4250366514291		600 mm	400 mm

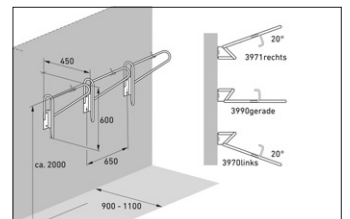

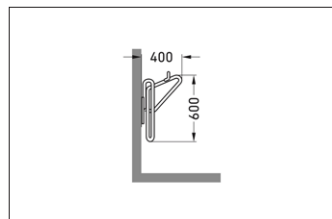

Parking spaces	1
Colour	Silver
Weight	2,00 kg
Construction type	Screwed / assembly kit
Base material	Steel
Mounting type	Wall mounting
Tyre width	64 mm
Configuration	One-sided
Positioning space depth	1100 mm

The Hanging Parker 3900 consists of a very robust construction of tubular steel with a solid large-surface mounting plate. Two differently shaped hoops fix the front wheel, which is suspended on a plastic-coated hook, thus protecting the sensitive rim from damage. The Hanging Parker 3900 is suitable for bicycles of all kinds and all tyre widths. In order to make better use of existing

space, there are three versions with different adjustment angles available. The recommended mounting spacing when using multiple parkers in series is 650 mm. The Hanging Parker 3900 is also available on request galvanised and RAL colour-coated according to your choice.

- + Very stable tubular steel construction
- + Robust, plastic-coated suspension hooks
- + Suitable for all bikes and tyre widths
- + Minimal space requirement
- + Recommended hook height approx. 2000 mm
