105800171	4250366538167	600 mm	856 mm	867 mm

Parking spaces	1
Colour	Silver
Weight	11,00 kg
Construction type	Screwed / assembly kit
Base material	Steel
Mounting type	On the floor
Tyre width	70 mm
Configuration	One-sided
Positioning space depth	1850 mm

The 4801 XXBF parker with frame rest offers a parking space for bicycles with up to 70 mm wide tyres, which means that even bicycles with extra-wide tyres can be parked safely. The safety of the bicycle is guaranteed: The plastic impact protection protects the bicycle frame from damage. The leaning bracket ensures that the bicycle cannot tip over, and round steel eyelets serve as attachment points for bicycle chains. The bicycle stand is prepared

to be attached to the ground and connected to other models in the series, creating a row system with any number of parking spaces, which can also be extended at a later date. The model is available in a variant for the high setting and one for the low setting. In a row system, the alternating use of the high and low setting allows the available space to be used optimally, as the bicycles can stand closer together without touching each other.

- + Corrosion-protected, robust steel construction
- + Plastic sheathing in black as impact protection and integrated fastening eyelets against theft
- + Tyre widths up to 70 mm
- + Row systems with any number of parking spaces can be realised
- + Prepared for floor mounting and row connection
